

ETHICAL vs UNETHICAL

USE OF AI IN CYBERSECURITY

AI is a double-edged sword in the digital realm. Learn to wield it with integrity and safeguard your business.

ETHICAL AI

PERSONALIZATION:
Enhances customer experiences with tailored support.

OPTIMIZATION:
Streamlines operations, predicts failures and automates tasks.

IDENTIFICATION:
Uncovers hidden trends for informed business decisions.

PROTECTION:
Vigilantly detects fraud and secures assets.

UNETHICAL AI

AGRESSION:
Powers cyberattacks, increasing their complexity.

INTRUSION:
Collects data, potentially breaching privacy.

MANIPULATION:
Crafts targeted disinformation campaigns.

DECEPTION:
Generates deepfakes, fostering misinformation.
